

SM-INS and LG-INS
Direct Vent Gas Fireplace Inserts

Renew Insert Series
Direct Vent Gas Fireplace Inserts

Renew your room and fireplace quickly and easily,
and enjoy a beautiful, efficient fire for years to come.

Shown: LG-INS with 4-Sided Signature Decorative Front in Black Suede

Transforming your woodburning fireplace into an efficient gas heater has never been easier, or more attractive.

Stellar's Renew Insert Series' unique design optimizes your viewing area while the proprietary component location delivers unsurpassed reliability.

Hand-crafted detailed logs together with a beautiful burn delivers the look of your woodburning fire, with the convenience of gas.

Details make the difference and our team carefully designed each and every log with realistic details inspired by the beauty of a true woodburning fire.

Renew Insert Series

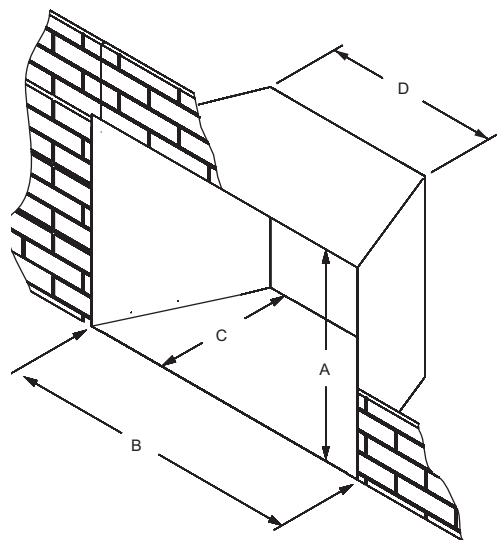

Direct Vent Fireplace Inserts

Available in two different sizes, the Renew Insert Series is designed to work in both masonry and zero-clearance fireplaces to convert your drafty woodburning fireplace into a clean-burning, efficient heat source with a convenient click of a remote control.

We've relocated the controls from the traditional location under the burner, and placed them on the back surround, opening up the viewing area to the largest view in the industry for both sizes. This also allows for easy installation and maintenance.

Follow the chart below for the minimum fireplace dimensions needed by your existing fireplace for the SM-INS and LG-INS inserts.

Minimum Firebox Dimensions

MINIMUM DIMENSIONS	SM-INS		LG-INS	
	INCHES	MM	INCHES	MM
Height	19-1/8	485	23-1/8	587
Front Width	30	762	34	864
Depth	14-1/2	362	16-1/2	419
Back Width (Interior)	17-1/4	438	21-1/2	546
For Both Zero-Clearance and Masonry Woodburning Fireplaces				

Decorative fronts fit any style of décor, and have the firescreen incorporated right into the design so you don't have to compromise on style for safety.

Two styles of fronts, in three decorative patterns, are available to frame out the beautiful fire and conceal any space that may be left between the insert and your original fireplace. Use the 3-sided front if your insert is placed flush with your hearth (see front cover). The 4-sided front is for installations up off the floor, completely framing your insert out on all four sides (see facing page). Each front has subtle decorative details in the corners.

Also shown is the brick refractory which is an option available for the LG-INS.

Mission 3 & 4-Sided Decorative Fronts
Shown on SM-INS with standard black interior

Small 3-Sided: 44-3/4"W x 26-1/8"H x 1"D
